PATENT
Filed: September 19, 2000

1-19, 21 (canceled).

20. (currently amended) A method for providing paper models, comprising:
- generating a model file at least in part using ~~3D-stereoscopic~~ photography of an object;
 - storing the model file on a data storage device, the model file being printable onto a paper substrate;
 - providing instructions regarding manipulating the paper substrate into a 3D model of the object; and
 - making the model file and instructions available to a user by allowing a user to access a computer site on a wide area computer network, providing, on the computer site, at least one model page, permitting the user to access the model page, and permitting the user to print at least one data file from the model page, the data file being useful for causing a computer printer to print a substrate having model indicia thereon, wherein the model indicia is useful for configuring the substrate into a 3D paper model of the object.
